of the new decorating collection**

## DESIGN FILE

SARA JANE ROTHWELL

*specialises in slick city gardens, and has become known for her roof terraces.*

*Based in London, she creates gardens in the capital and Home Counties, and has been practising for nine years. Her gardens tend to be geometric and structural in concept, with strong axial lines softened by mainly herbaceous planting, as shown in the garden pictured here, designed for clients in Chelsea.*

*'Each design is very much client-led,' she says, 'and I can sometimes be quite experimental as long as the client allows.'* [www.londongardendesigner.com](http://www.londongardendesigner.com)
